

Bühler Raleigh Apprentice Program

Partner of NCTAP

Kickstart your career

Earn while you learn with a registered 4-year apprenticeship program at Bühler. Certified by the North Carolina Triangle Apprenticeship Program (NCTAP), apprentices will earn an Associate of Applied Science degree (AAS) in Mechanical Engineering Technology and a Journeyman Certificate from the NC Community College System and USDOL, free of college debt.

Gain valuable experience with 6,400 hours of learning manufacturing skills on-the-job and 1,600 tuition-free hours of college education. Apprentices are full time Bühler employees, balancing days on-site with time in the classroom at one of three local communities colleges, while earning a paycheck and full-time employee benefits.

Apprentices begin the program as High School Juniors or Seniors with a summer pre-apprenticeship. The four-year program begins after a successful summer pre-apprenticeship.
