

Stellar Taurus

The germinating
power of pulses

Turbocharge your capacities

The germinating power of electric pulses

Bühler's patented Stellar technology uses nanosecond-pulsed electric fields to dramatically enhance the germination of cells without altering them.

Electrifying germination results

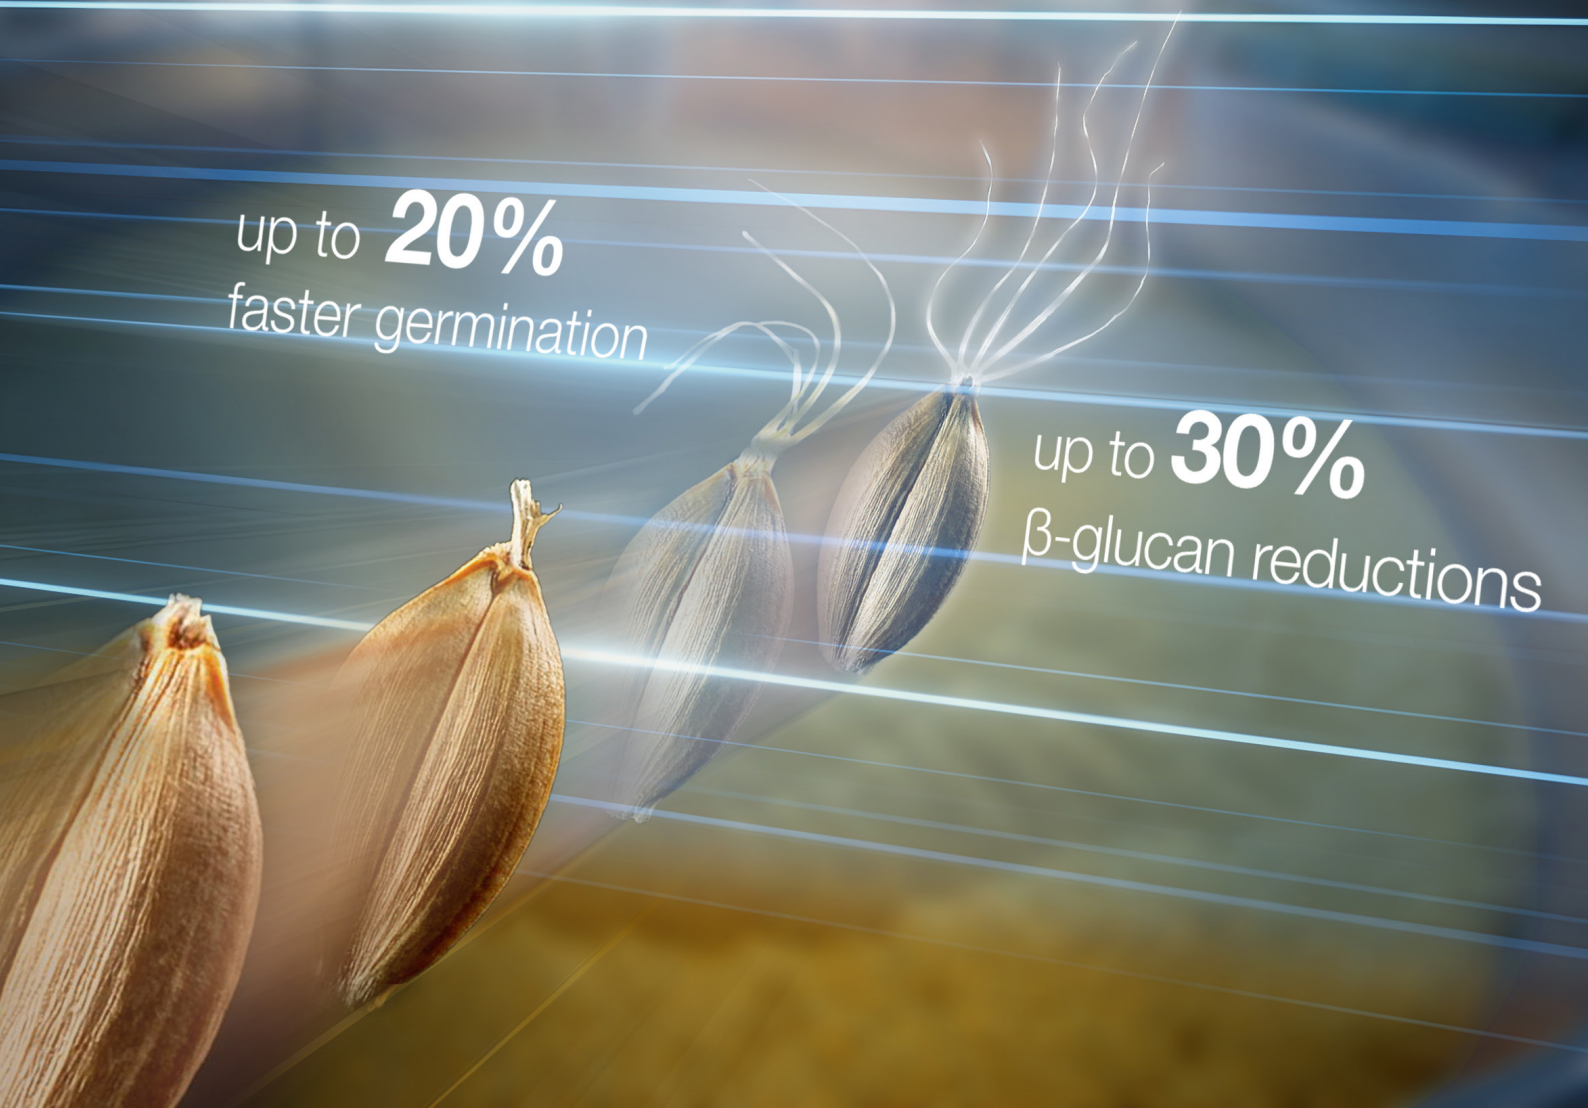

With the malting industry facing ever-increasing energy and raw material costs, Stellar technology has the power to transform your operations – with no need to overhaul your existing infrastructure or processes.

Our Stellar Taurus solution stimulates growth by targeting the grain's intracellular membranes with electromagnetic technology, leading to up to 20% faster germination as well β -glucan reductions of up to 30% – all with no additional capital expenditure.

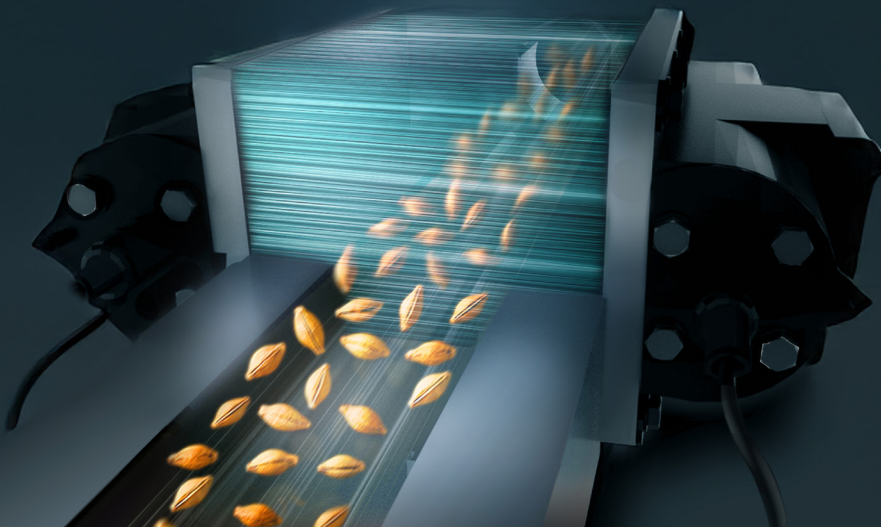

up to **20%**
faster germination

up to **30%**
 β -glucan reductions

Stellar Taurus

Maximize capacity and minimize costs with effortless installation

nPEF-technology tailored for wet transport

Patented technology with no similar product on the market

β -glucan reductions of up to 30%

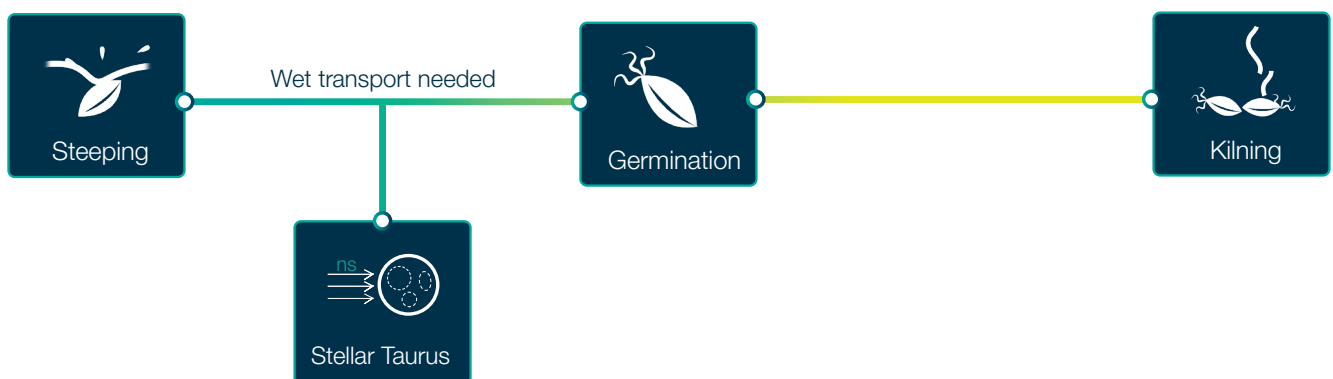

No additional capital expenditure

Up to 20% faster germination

Stellar Taurus comes in a convenient, space-saving and hygienic design, and can easily be installed between batches with minimum downtime.

Simplified operations

Its full compatibility with any automation system ensures seamless introduction into your production processes, and ease of use for operators. Suitable for any malting plant with wet transport, Stellar Taurus has pre-set software and recipes, which means you can start experiencing the benefits straight away.

Boost your efficiency today!
