Retrofit PUSHclock

Easily adjustable position indicator

Adjust your clocks in no time! The hassle-free, toolless and easily adjustable handwheel clock allows you to save one of the most important resources – time.

Setting the position indicator after adjusting the grinding gap has never been easier! No tools needed. Just push the clock with the spring mechanism and set the 6 o'clock position.

Available for the following roller mill types:

- Antares MDDR/T, Diorit MDDY/Z, Dolomit MDDP/Q
- Newtronic MDDM/O in combination with retrofit gap adjustment with clamp lever

Types of retrofit kit available:

- 4 toolless handwheels green or black (4-roller mill)
- 8 toolless handwheels green or black (8-roller mill)

Quick installation time of about 15 minutes per roll pack

Benefits

Uptime

Quicker and easier adjustment process saves operators time

Roller Mill Safety

No more overtightening of screws or needing tools to adapt the clock

Accuracy

Always show the correct setting
