Plant Essential
Digital service for plant efficiency improvements

Improve plant efficiency

Plant Essential is a digital service designed to boost plant efficiency through comprehensive analytics, real-time monitoring, and detailed reporting. It encompasses a suite of dashboards for analyzing plant performance quickly and effectively.

Benefits

Continuous improvement:
Facilitates fast and effective analysis of all events, improving plant availability with features like event monitoring, critical error supervision and detailed event tables.

Data-driven decision making:
Provides real-time monitoring and analytics for informed decisions, ensuring transparency and fast actions.

Enhanced operational efficiency including OEE:
Plant Essential in combination with Comparision Plus boosts productivity by continuously tracking biggest losses and root causes.
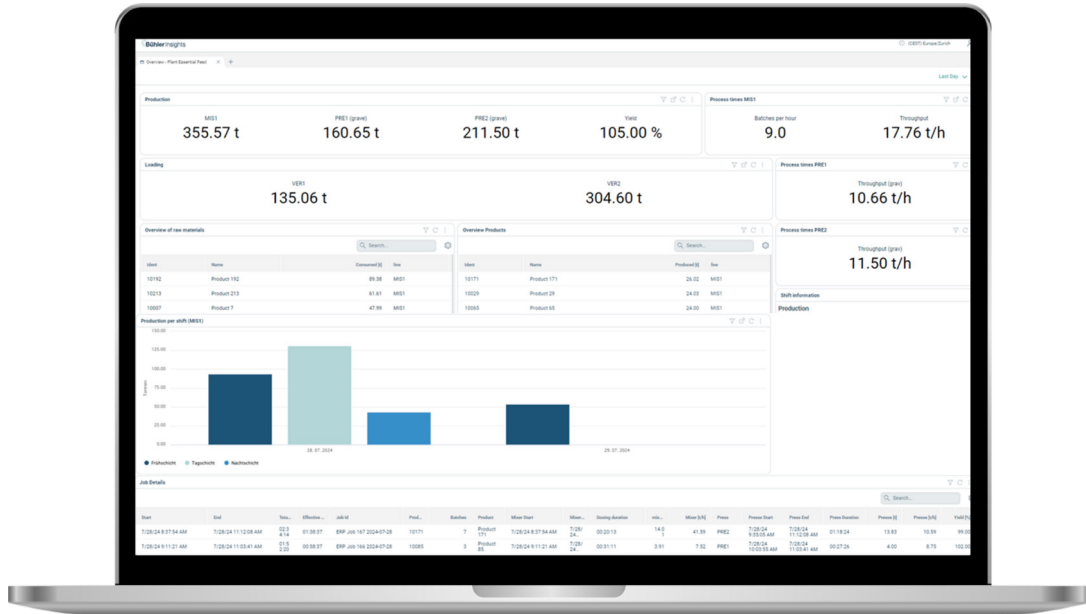

Key features

– Overview of plant performance

– OEE tracking and continuous improvement with Comparision Plus mobile app

– Event analysis

– Dosing accuracy details

– Mixing line analytics

– Truck loading details

– Packing detail dashboard

Innovations for a **better world.**
