

High hygiene with stainless steel sieve frame

Bran finisher MKLA-45/110

Stainless steel sieve frames for the MKLA-45/110 bran finisher with polygonal shape improves hygiene, increases food safety and reduces the time required for changing the sieve.

Efficiency and food safety

The requirements in the area of hygiene and food safety are increasingly demanding. For existing plants, Bühler meets these requirements with the retrofit packages. The SaniBran retrofit package replaces the wooden sieve frames with polygonal stainless steel frames. Clamp connections replace fixed connections between frame and sieve, which leads to a quick sieve change and thus reduces machine downtime.

Type

The polygonal design of the sieve frame ensures an optimum yield of your existing MKLA-45/110.

The package

The retrofit package includes:

- One polygonal stainless steel sieve frame
- One sieve plate of your choice
- One conversion instruction

Additional replacement sieve plates can be ordered as an option.

Benefits

- Optimum yield thanks to polygonal design
- Increased hygiene due to stainless steel sieve frame
- Easy and fast sieve change thanks to optimized fixing mechanism
