EcoIntelligence 2.0
Intelligent dryer control

A range of innovative features means the Bühler EcoIntelligence 2.0 is setting new standards in dryer control systems. In addition to clear process visualization, clearly arranged recipe management, and complete traceability, the dryer control system also has helpful diagnostic options.

The control system also makes it possible to network systems with several dryers — these can easily be linked to each other thanks to the open interfaces.

EcoIntelligence 2.0 can be seamlessly integrated into Bühler's system control or the control systems of third-party providers.

Benefits

Intuitive operation	**Seamless integration in the plant control**
Monitoring and traceability of data	**Quick overview through animated process representation**
Simple installation of updates	

|	
Mobile access	**Intuitive display design**
Quick and efficient response to operational statuses	**Reduction in costs associated with delayed status handling**
Minimized issues in dryer and plant operation	

Innovations for a **better world.**

BÜHLER

EcoIntelligence
## Saving energy and money

Intuitive design and operation

Minimized costs and operating errors due to intuitive design and easy access to dryer control features.

Overview

Smooth integration into plant control

EcoIntelligence and the Bühler Eco Dry can be seamlessly integrated into Mercury, WinCos, Pluto, and other third party control systems.
