

**DataView.**  
Intuitive, reliable  
and efficient.

Control unit for Buhler die casting cells.

## DataView for Bühler die casting cells.

Control the entire cell with five fingers.

DataView opens up completely new possibilities for interaction between man and machine. Information is exchanged in real time, in an extremely user-friendly manner. The new DataView control unit makes handling the cell easier, faster and more intuitive.

Fast, intuitive machine control with up to 25% less programming time

Optimum ease of use thanks to combination of multi-touch screen and manual control elements

Maximum flexibility due to freely positionable, rotatable and height-adjustable control unit

Precise monitoring of the casting process thanks to clear graphic display

Sophisticated design for easy operation of the die casting cell

Chip card logon for fast access to the system

High reliability when subject to continuous strain in a rough foundry environment

Convenient operation with multi-touch screen

Control switches for quick access and fast machine operation

Access also from smartphones and tablets and your computer
