

Application & Training Center

Testing & Trial Platform

The Application Center at Bühler India is a state-of-the-art center with facilities to conduct product/machine trials and optimize processes based on the requirement.

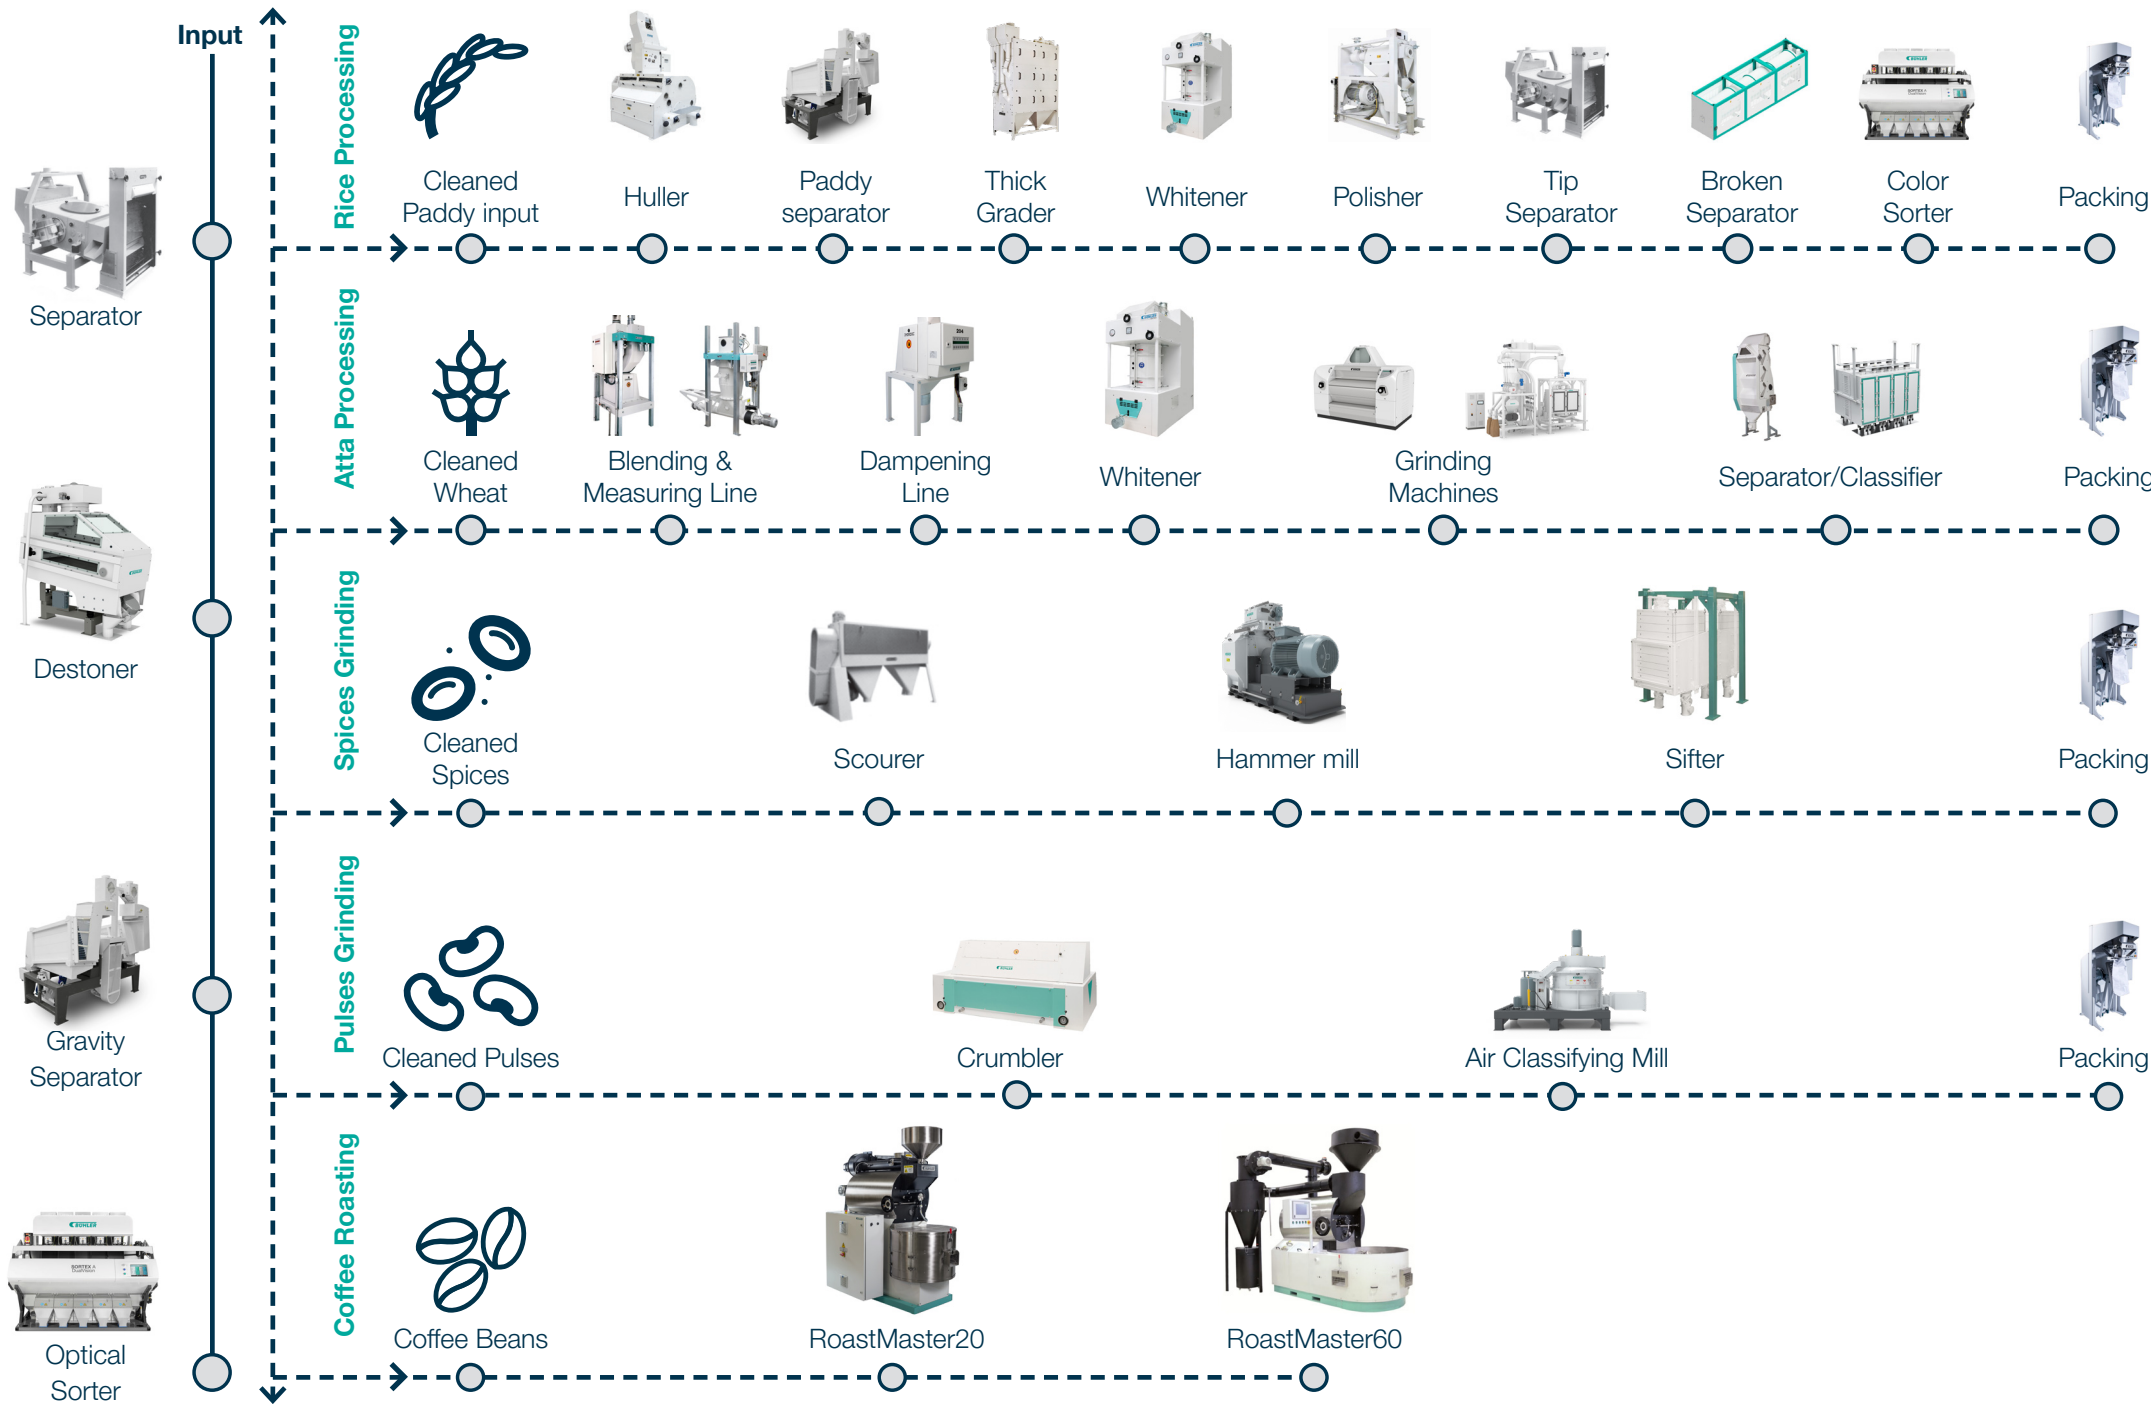

The integrated application center provides hands-on working and operation training, allowing participants to understand end-to-end processes - from handling material at a commercial scale to final product packing.

Working together with Bühler’s process experts, the center allows you to develop and test products for a variety of grain processing requirements.

Going from raw material to final product requires numerous steps. The goal of Bühler’s experts is to help you discover ways to improve efficiency at every stage – whether it’s the entire process or just one.

Following are the set-ups installed

- Rice Processing
- Spices Grinding
- Pulses Grinding
- Whole Wheat Atta
- Coffee Roasting
- Cleaning, Grading & Sorting for multiple commodities

Application & Training Center.
Let’s develop the future together!

Training

Bühler is customer’s partner and believes in updating its valued customer by providing latest process technology, machines operation and plant maintenance to get full benefit by efficient operation and maintenance of their plants and machineries.

The target oriented training programs offers the best opportunity for mill proprietors, mill operating managers and operators to undergo training.

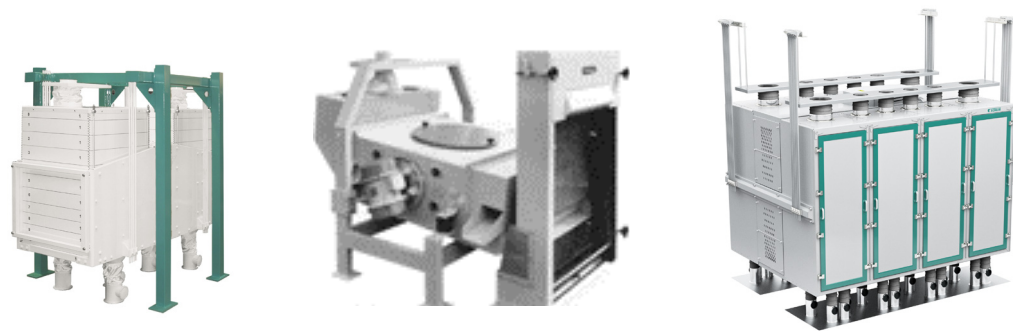

Training and face-to-face discussions with machine and process experts provide a unique training experience

A comprehensive training program comprising of - processing theory, machine functionality and testing & observing instantly makes the understanding easy and memorable for participants.

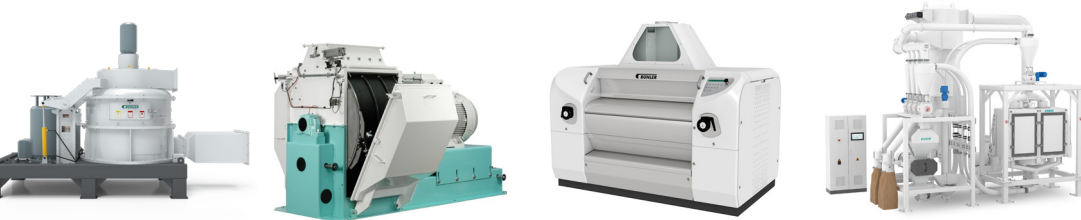

Plant control system is part and parcel of any training programme. Energy conservation and savings are the key factors to operate a mill in a profitable manner.

Be it on Individual machines or complete process, we will assist you! Get to know the Bühler machines with customized training which is optimally adapted to your requirements.
