

New scraper knives for three-roll mills.

Grinding & Dispersing Customer Service

Bühler provides new, advanced steel scraper knives for its three-roll mills. In a series of tests, knife wear and product scraping were analyzed in detail and improved. The results are optimized angles on the scraping edge and the use of best performing materials.

Perfect product scraping reduces product loss on the third roll while increasing operational reliability. Furthermore, the new scraper knives reduce the maintenance costs of the machines due to less wear. The new scraper knives are marked with the Bühler trademark.

Benefits

- Optimal price-performance ratio
- Highest and constant knife quality
- Highest production efficiency of three-roll mill
- Lower operating/maintenance costs
- No unplanned machine failures, due to roll damages
- Guaranteed availability "Off-the-shelf"

Scraper knives with Bühler quality standards.

Optimal throughput rates

Optimal product removal
