

Packing System InBax for Powdery Products

Reliable Packing of Powders

Our newly offered packing system InBax forms a ready-to-install manual bagging station for reliable packing of non-free-flowing goods.

The system includes a packing control, a screw feeder and an integrated automatic weighing and filling system capable of accurately dosing products like feed meal, wheat or maize flour, starch and more. It is applicable to 10-50kg open-mouth bags and can achieve an estimated production capacity of 110 bags per hour (at 25kg bag weight).

InBax is a very compact and convenient packing system to integrate. Globally, around 1000 installed systems have proven its reliability and ease-of-use.

Technical Information

Bag Sizes	<ul style="list-style-type: none"> Width 320 - 600mm Length 550 - 1050mm 	
Bag Materials	All vented bag materials (min. air permeability 150mbar)	
Capacities	<ul style="list-style-type: none"> For 10kg bags - 135 bags/h For 25kg bags - 110 bags/h For 50kg bags - 85 bags/h 	
Power Consumption	<ul style="list-style-type: none"> Bagging station: Dosing Screw : Conveyor belt: Portable bag closer: Sewing plant: 	<ul style="list-style-type: none"> 0.05 kW + 2.20 kW + 0.75 kW + 0.09 kW + 1.00 kW
Air Requirement	6 bar pressure, air must be dry, clean and not lubricated	
Aspiration	5m³ / minute	
Additional Space	<ul style="list-style-type: none"> Wall mounted control cabinet (W1000 / H1400 / D350mm) Space for operator Machine clearance Screw clearance (1900mm) 	

Key benefits:

- Full flexibility due to manual bag handling allowing usage of various bag types, sizes and materials.
- Reliable operation and low maintenance costs due to system's rigid design and convenient access for service and sanitation.
- Strong local Bühler customer service network always ready to provide competence and support.
- Accurate bag weights due to precise dosing and exact weighing of product.
