

**Focus on what really matters.** Gain increased performance visibility and reduce risk with remote real-time monitoring.

#### Look no further than the SORTEX Monitoring System.

SMS provides an overview of the key performance indicators of your Bühler SORTEX machine and delivers actionable insights to increase your productivity, yield and efficiency. Dashboards tailored towards different user needs help to make informed decisions from anywhere:

- Spend less time supervising and get notified by real-time alarms whenever unexpected spikes or downtime is occurring.
- Monitor closely the ratio of defect types and input contamination to optimize product quality and yield.
- Take advantage of historical data to benchmark across batches, shifts, suppliers and multiple production sites.

#### Benefits

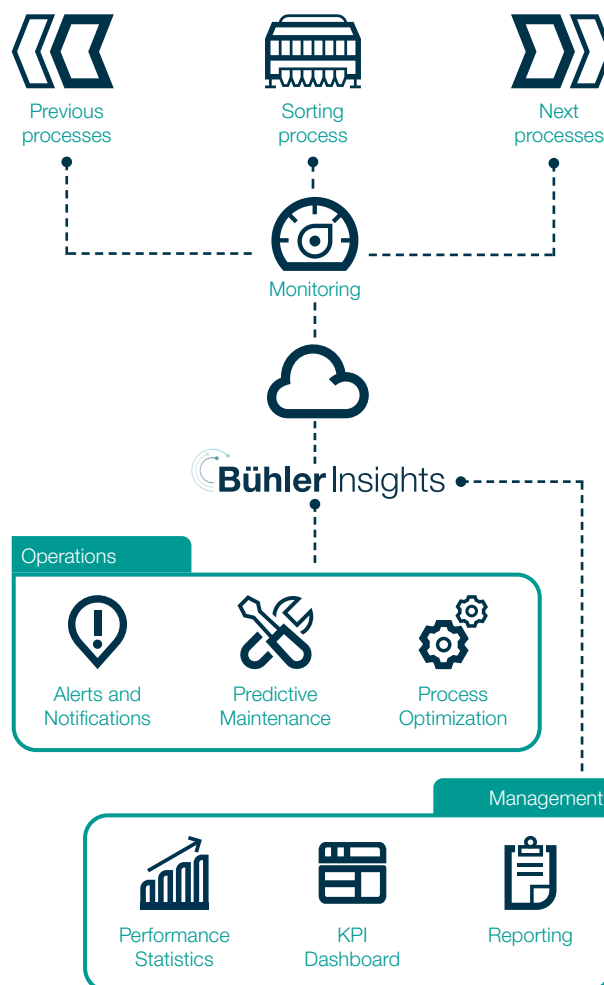

Full remote traceability

Greater operational efficiency

Improved yield and quality output
